

Full Stack Staff Software Engineer - React Native, React and Distributed Systems

Professional Summary

Full-Stack Staff Software Engineer with 14+ years of experience delivering scalable mobile applications, web platforms, microservices, and Azure-based cloud architectures across FinTech, Mortgage, Small-Dollar Lending, Supply Chain, SaaS, and Neobanking domains. As a founding member of a FinTech startup, I led the mobile, web, and API strategy, successfully launching a secure, mobile-first banking platform. Skilled in **React Native, TypeScript, React, Swift, Kotlin, Express.js, Spring Boot, Azure, PostgreSQL, and Monorepo architectures**, I bring deep expertise in building high-performance cross-platform and native applications, designing scalable solutions, and delivering products in highly regulated environments. I have hands-on experience building **Agentic AI solutions**, including designing **MCP-based AI agent workflows** that integrate **LLMs, enterprise APIs, and tool orchestration** to automate business processes through context-aware, multi-step decision making. I leverage AI engineering tools such as **Claude, OpenAI Codex, and GitHub Copilot** to accelerate software design, implementation, testing, refactoring, and documentation while maintaining high standards of code quality and security. A strong advocate for engineering excellence, I specialize in **Application Security (OWASP, SAST, DAST, PCI DSS, Code Obfuscation, Passkeys, App Attest), Test-Driven Development (TDD), and CI/CD Automation**.

Strategic Architecture & Platform Delivery

- Built and scaled the **mobile engineering function** at a **Series A FinTech startup**, leading the architecture and launch of a **mobile-first banking and credit platform** with **Mastercard**, along with **Predictive Analytics, NLP, and AI/ML integrations (React Native)**.
- Developed a warehouse management web application using **Next.js** for the frontend. The application was designed to help warehouse staff manage inventory, track shipments, monitor stock levels, and process inbound and outbound orders efficiently. (- **React**)
- Architected and delivered multiple releases of the **Mr. Cooper mortgage application (3M+ users)** in the FinTech domain. (**Swift and Java**)
- Rebranded **Central Pacific Bank's React Native application**, improving architecture, UX, and performance, increasing the App Store rating from **2.0 to 4.5**.
- Designed and implemented a **modular Monorepo architecture** using **Vercel TurboRepo** and **pnpm, Drizzle, Hono**, standardizing code sharing, build orchestration, type-safe contracts, and developer workflows across **React Native, Next.js, and backend applications**.
- Migrated a **single-tenant credit application (React Native)** to a **white-label, multi-tenant architecture**, enabling dynamic theming, secure secret management, CI/CD-driven build customization, and **Contentstack CMS** management across multiple brands.
- Deep expertise debugging **React Native** applications across **JavaScript, Native Modules, TurboModules, iOS (Swift/Objective-C), and Android (Kotlin/Java)** layers.
- Integrated **BLE-based barcode scanners** and handheld devices with a **React Native** application, enabling real-time **UPC and LPN** scanning workflows in warehouse environments.
- Architected and implemented a scalable **push notification infrastructure** using **Azure Notification Hub, Service Bus, and Event-Driven Architecture**, while leading the migration from **OKTA to Azure B2C (OAuth 2.0, JWT)** for **3M+ mobile users**.
- Independently designed, architected, and launched **Confiora** using **NestJS, SwiftUI, Prisma, CloudKit** and **Copilot, OpenAI Codex, Claude, and ChatGPT**, driving end-to-end execution across mobile architecture, UX, backend integration, and product delivery.
- Built **developer tooling, mock server frameworks, CI/CD pipelines, testing infrastructure, and release automation**, improving **Developer Experience (DX)** and engineering velocity.
- Integrated and validated leading FinTech platforms including **Finicity, Plaid, Persona, Repay, and Atomic**.
- Delivered multiple **greenfield applications**, from technology selection and architecture design through end-to-end implementation.
- Defined messaging and integration strategy using **Apache Kafka** and **RabbitMQ**, implementing event-driven patterns, dead-letter queues, retry policies, and asynchronous workflows to support highly available, scalable distributed systems.
- Explored and prototyped **AI agent architectures using LLM tool-calling, Model Context Protocol (MCP)**, and function-based integrations, enabling AI-driven orchestration of APIs, databases, and enterprise systems through secure, tool-based workflows.
- Extensive experience designing and implementing **REST APIs, GraphQL APIs, WebSockets**, and backend services using **Express.js** and **Spring Boot**.
- Hands-on experience with **Azure cloud-native services**, including **API Management (APIM), CI/CD pipelines, App Center, and Application Insights**.

- Strong expertise in **Accessibility, Usability, and Mobile Performance Optimization**.
- Skilled in **LangChain, Prompt Engineering, Azure OpenAI, TensorFlow, and Core ML**, integrating LLM-powered solutions into mobile and backend platforms.
- Extensive experience with **Contentstack CMS**, including **Delivery APIs, dynamic content, branching, and configuration management**.
- Strong expertise in **OWASP, SAST, DAST, Passkeys, App Attest, Penetration Testing, and PCI Compliance**.
- Foundational knowledge of **Web3, Crypto, and Blockchain ecosystems**.

Engineering Excellence & Observability

- Established and enforced **Test-Driven Development (TDD)** using **XCTest, JUnit, Detox, Maestro, and Cobertura**.
- Built automated testing frameworks using **Appium and Selenium**, executed on **SauceLabs** and **LambdaTest**, fully integrated into **Azure DevOps, Artifactory, App Center, Fastlane, and GitHub Actions**.
- Implemented observability and analytics using **Firebase, Google Analytics, Datadog, and New Relic**, enabling real-time diagnostics, performance monitoring, and crash reporting.
- Produced enterprise-level **architecture diagrams, technical documentation, presentations, and process workflows**.
- Proactively identified architectural and operational risks, implementing mitigation strategies to ensure **scalability, reliability, and delivery continuity**.

Leadership & Cross-Functional Collaboration

- Led cross-functional teams across **iOS, Android, Backend, and QA** organizations spanning onshore and offshore locations.
- Conducted **code reviews**, mentored engineers, and fostered technical growth and engineering excellence.
- Translated complex business requirements into actionable **technical roadmaps** while maintaining strong stakeholder alignment.
- Facilitated **Agile ceremonies**, including stand-ups, sprint planning, retrospectives, and continuous improvement initiatives.

Professional Experience

Ascendion Inc, Remote

Sept 2025 to Present

Fullstack Senior Software Engineer (Contract)

Skills: Next.js, React, TypeScript, React Native, Spring Boot, Kotlin, PostgreSQL, SQL Server, Kafka, RabbitMQ, Monorepo (TurboRepo, pnpm), Prisma, Flyway, Docker, GitHub Actions, TanStack Query, Jest

- Designed and developed scalable **Next.js, React, and React Native** applications supporting enterprise supply chain and warehouse operations used across multiple distribution centers.
- Designed and implemented **MCP-based AI agent workflows** integrating LLMs, enterprise APIs, and tool orchestration to automate inventory management, vendor operations, and supply chain processes through context-aware, multi-step decision workflows.
- Built modern **Next.js** applications leveraging **Server Components, SSR, CSR, API Routes, and optimized data-fetching strategies**, improving application performance and user experience.
- Contributed to a **Monorepo architecture (TurboRepo + pnpm)**, enabling shared UI components, business logic, API clients, and streamlined development across web, mobile, and backend platforms.
- Developed reusable **React and Next.js component libraries**, accelerating feature delivery and improving maintainability across applications.
- Built and scaled **Spring Boot/Kotlin microservices** supporting inventory disposition, vendor routing, shipment processing, inventory relief, and operational workflows.
- Designed and implemented **RESTful APIs and event-driven architectures** using **Kafka, RabbitMQ, PostgreSQL, SQL Server, Flyway, and Prisma**.
- Developed **Kafka producers and consumers** for high-volume inventory and shipment event processing, enabling scalable asynchronous communication between distributed services.
- Implemented **retry strategies, Dead Letter Queues (DLQ), reconciliation workflows, and message monitoring**, improving reliability and fault tolerance of backend systems.
- Built business workflow engines for inventory disposition, vendor returns, and warehouse exception handling while ensuring compliance with enterprise business rules.
- Implemented **TanStack Query** for server-state management, caching, background synchronization, and optimized data-fetching across web and mobile applications.
- Optimized frontend performance through **code splitting, lazy loading, memoization, virtualization, and efficient state management**, improving responsiveness for high-volume operational workflows.

- Built and maintained **CI/CD pipelines using GitHub Actions and Docker**, enabling automated testing, deployments, and faster release cycles.
- Collaborated closely with product, design, and engineering teams to deliver scalable **full-stack solutions** serving large-scale enterprise operations.

Elevate Credit, Inc, Dallas (Remote)

Mar 2022 to Sept 2025

Staff Mobile Platform Engineer - ReactNative

Skills: Team Leadership, Mentorship, Product Strategy, Delivery Execution, Cross-Functional Collaboration, KPI-Driven Engineering, React Native, Expo, TypeScript, Kotlin, Swift/Objective-C, GraphQL, REST APIs, WebSockets, Azure Functions, Azure App Services, Azure B2C, CI/CD, GitHub Actions, Azure Pipelines, Firebase Crashlytics, Datadog, Google Analytics, Jest, Detox, Maestro, XCTest, TanStack Query, Fastlane, AppCenter, OWASP, SAST, FaceID, TouchID

- Reported directly to **CTOs and SVPs**, owning **mobile architecture, delivery strategy, platform modernization, and engineering execution** across FinTech and Banking platforms.
- Architected and launched a **greenfield mobile-first digital banking platform** using **React Native**, leading architecture, security, delivery, and App Store releases.
- Led integrations with **Mastercard, Atomic (Direct Deposit), Persona (KYC/IDV), and Fincity (Bank Verification)** to enable secure onboarding and banking workflows.
- Transformed a **single-tenant application into a scalable multi-tenant (white-label) platform**, enabling dynamic branding, feature flags, policy management, and reusable architecture.
- Implemented **Azure B2C multi-tenant registration flows**, secure authentication, and enterprise identity management using **OAuth 2.0, JWT, SSO, FaceID, and biometrics**.
- Owned **Azure App Services, Functions, API Gateway, CI/CD pipelines, release management, and production operations** supporting mobile platforms.
- Partnered with infrastructure teams to implement **MDM capabilities** for enterprise-managed devices.
- Evaluated and led security initiatives involving **Promon, Quokka, Snyk (SAST), code obfuscation, OWASP, and PCI compliance**.
- Integrated **Contentstack CMS** and analytics platforms to enable dynamic content delivery, experimentation, and marketing insights.
- Built a **mobile fake-server framework** for iOS and Android, enabling backend-independent development, rapid prototyping, and improved developer productivity.
- Delivered an **ML-powered transaction categorization engine** using **BERT embeddings**, improving financial insights and customer engagement.
- Established **TDD practices** using **Jest, React Testing Library, Detox, XCTest, and Maestro**, increasing unit test coverage from **52% to 80%+**.
- Built automated testing and release pipelines using **Azure DevOps, Appium, Selenium, SauceLabs, LambdaTest, Fastlane, and GitHub Actions**.
- Improved application stability through code reviews, testing standards, and engineering best practices, significantly reducing crashes and increasing release confidence.
- Mentored engineers, fostered a strong engineering culture, and partnered closely with **Product, Design, Backend, Security, Compliance, and Marketing** teams to deliver business outcomes.

Central Pacific Bank, Boulder

Oct 2020 to Feb 2022

Principal Software Engineer - Mobile

- **Skills:** Leadership, Mentor, Cross-Team Collaboration, Polyglot Development, Mobile Architecture, ReactNative, TypeScript, Next JS, React, Detox, Jest, Optimization, AI Integration, SDK Integration, Secure Authentication, Express.js, SpringBoot, Azure, CI/CD, SendGrid, Twilio, HTML, CSS.

Led a major mobile app and website rebranding initiative for Central Pacific Bank as Principal Engineer, improving **UX and performance**, and raising app store ratings from **2.0 to 4.5**.

- **Developed and launched features** across both **iOS and android platforms (ReactNative)** for the CPB banking app and **react website**.
- **Led and mentored a team of Junior developers**, ensuring **on-time delivery** and enforcing **high code quality standards**.
- **Designed and implemented** core banking functionalities, including **Instant Transfers, Transactions, Card Management, and External Transfers** via **REST APIs**.
- **Enhanced the Angular-based banking website** by **improving user experience** and optimizing **performance** for faster load times and smoother interactions.
- **Architected and integrated Azure-based AI agents**, significantly enhancing **identity verification accuracy** and **reducing agent handling time**.
- Integrated third-party SDKs including **Atomic (Direct Deposit), Persona (ID Verification), and Fincity (Bank Verification)**.
- **Integrated Salesforce with DocuSign**, enabling **seamless digital document signing** and **automated workflow processes**.

- **Enhanced secure login flows** using **OpenID** and added **biometric authentication** via the **Local Authentication framework**.

Mr Cooper Mortgage, Coppell

Mar 2016 to Sept 2020

Mobile Applications Lead

Skills: Leadership, Mentor, Architecture, Swift, Objective C, Java, TDD, Extreme Programming, Crosss Team Collobaration, A/B testing, Crashlytics, CI/CD, Quick and Nimble, XCTest, Jenkins, UIKit, StoryBoard, CocoaPods, VIPER, MVCP, Carthage, Quick and Nimble, Mockito, X code, Instruments, SIRI, Postgres, NLP, TensorFlow, AVFoundation, Ruby on Rails

Lead iOS and Android Architecture and Development for Mr. Cooper's Mortgage Servicing App (3M+ Users)

- Delivered a world-class, high-quality iOS application for a mortgage servicing platform serving over 3 million users.
- Started as a Senior Mobile Engineer and contributed extensively to the Objective-C codebase using Extreme Programming (XP) practices.
- Collaborated closely with Product Managers to implement key mortgage servicing features.
- Ensured robust coverage by writing unit tests using **Quick** and **Nimble**.

As Lead Engineer:

- Mentored junior developers(iOS, Android, QA), providing technical guidance, code reviews, and fostering strong engineering practices.
- Migrated architecture from **MVCP** to **VIPER** design pattern to enhance scalability and maintainability.
- Created HomeIntelligence **Video** based Workflow.
- **Developed an** on-device financial assistant using **TensorFlow Lite**, **NLP**, and, with **Siri-based voice command support** to streamline hands-free interactions and document scanning on mobile.
- Modernized the codebase by migrating legacy Objective-C code to **Swift** across all screens.
- Implemented **Push Notification** features using **Azure Notification Hub**.
- Transitioned unit testing from **Quick/Nimble** to native **XCTest** framework.
- Set up a **Ruby-based Fake API server** for end-to-end integration testing with **XCUITest**.
- Introduced **A/B testing** via **Firebase Remote Config** for feature experimentation and rollout strategies.
- Implemented a custom **Jenkins CI/CD pipeline**, enhancing build and deployment automation.
- Led the secure migration of 3 million users from **Okta** to **Azure B2C** using **OAuth 2.0** authentication.
- Introduced the Appstore rating feature based on the remote config.

Ivy Mobility Solutions Ltd, Chennai

Aug 2013 to Mar 2016

Lead iOS Engineer

Offered SaaS-based mobile app solutions tailored for **B2B clients** in **Healthcare** and **Retail** domains.

Skills: iOS Development, POS, Mentor, Objective-C, MVC Architecture, Team Leadership, SaaS (B2B), Cross-Functional Collaboration, OTA Release, PreSales

- **Led and managed a team of 8 iOS engineers**, driving **successful delivery and implementation** of a **scalable B2B iOS product**, while overseeing **performance appraisals** and providing **constructive feedback** for individual growth and team development.
- **Developed white-label iPad apps** using **Objective-C** and **MVC architecture**, tailored for **Healthcare** and **Retail** clients with custom branding and functionality.
- **Optimized login performance** using **multithreading** and **SQLite**, enabling support for **100k+ transactions per login**.
- **Delivered enterprise-grade features** including **digital signature capture**, **SOAP-based Siebel CRM integration**, **multi-region localization**, and **reporting modules** with **chart visualizations** and **JSON data conversion**.
- **Managed App Store and Enterprise licensing**, enabling **seamless deployment and distribution** across diverse client environments.

Tata Consultancy Services, Chennai

Mar 2011 to Aug 2013

IOS Engineer

Skills: iOS Development , Objective-C , MVC Architecture,

Boston Scientific (CARE App)

- Developed the CARE iPad, iPhone app for Neuromodulation sales reps to manage activities, patients, physicians, contacts, inventory, and facilities.
- Integrated with SAP CRM and R/3 using JSON REST services.
- Led a team of 2 developers, assigned tasks, and ran daily standups.
- Used MVC with Singleton, CoreData for offline storage, and implemented NSOperations, Blocks, and Notifications.
- Delivered on-demand sync (v1.0) and Data Change Notification (DCN) sync (v1.1) approaches.

Education

Masters in Computer Application
Anna University

2007 to Jun 2010

Bachelor of Computer Science
Thiruvalluvar Govt Arts and Science College, Rasipuram

May 2004 to Jun 2007
